

Call for Papers

Quantitative Methods in Defense and National Security Conference

Date: February 7 – 8, 2007

Place: George Mason University, Fairfax, Virginia

Website: <http://www.galaxy.gmu.edu/QMDNS2007/>

Goal: To promote collaboration between

- Users who have quantitative defense and national security problems
- Statisticians, mathematicians, operations researchers, engineers, others

Call for papers that:

- Describe quantitative methods that can be used to solve problems in defense and national security. Some *suggested areas* are:

Data mining

Network analysis

Data fusion

Bioterrorism

Automated discovery

Forensic analysis

Operations research

Modeling & simulation

Information integration

Social network analysis

Syndromic surveillance

Privacy and data integrity

- Describe defense and national security data analysis problems

Extended abstracts due online: January 1, 2007
